

ACCESS CONTROL SOLUTION FOR TIME-BASED ATTRACTIONS

Time Tracker

Sacoa
CASHLESS SYSTEM

Time Tracker

Time Tracker sets a timer onto both IR and NFC wristbands to easily track the operation of a time-based attraction, such as trampoline parks, rope courses, and other time-based activities.

FEATURES

IR Sensor

Enable IR wristbands simply by pointing to them.

NFC Sensor

Enable NFC wristbands simply by tapping them to the unit

HD Touch Screen

Embedded touch screen to prevent cracks or damage.

One-Touch Activation

Press the physical button to quickly and directly activate a wristband.

Strap Slots

Attach a strap to TimeTracker for easy carry and to avoid accidental drops.

Color Identification

Visual identification for when time is active, running out, or has run out.

*Manage, report, and obtain records of all programmed wristbands.
OPTIMIZE your operation, INCREASE control, and MAXIMIZE your revenue!*

Real-time tracking for a next-level operation

TimeTracker communicates with LED wristbands to manage time-based attractions, such as trampoline parks, climbing walls, rope courses, and more, all in real time!

The LEDs within the wristbands themselves change color based on how much time is remaining, warning customers when they are short on time and allowing employees to easily identify customers whose time has run out.

Additionally, you can manage, report, and keep records of all registered wristbands, enabling secure monitoring throughout the day.

Communication with the wristbands is wireless, and Time Tracker connects to the server via Wi-Fi to receive commands and send updates.

Reduce costs; increase profits with our reusable wristbands

• Cost-Effective & Reusable

Unlike with disposable alternatives, our LED wristbands can be reused multiple times, providing significant cost savings.

• Secure Magnetic Locking System

Each wristband features a magnetic locking system that can only be opened by staff, preventing theft and loss.

• Comprehensive Data Tracking & Reporting

The Sacoa system automatically registers all transactions and operations, providing detailed reports on player interactions, sales tracking, and event performance. These insights help optimize marketing strategies, increase sales, and enhance the overall customer experience.

• On-Demand Fun

Traditional wristbands limit customers to using attractions at set times, like every hour or half hour. Time Tracker removes these time restrictions, allowing patrons to access attractions whenever they want. This increases attraction use and reduces any extra free time given to customers.

Using Time Tracker in 3 easy steps

- 1** The customer will tap their PlayCard at the Spark Reader correlating to however much time they would like to purchase.
- 2** Time Tracker will receive the information and prepare to activate a wristband.
- 3** The employee will tap or aim Time Tracker to the wristband, push the activation button, and the time on the wristband will begin to count down.

Dimensions

W:60 / H:165 / D:22 mm.
W:2.36 / H:6.5 / D:0.86 in.

Weight

170 gr.
0.37 lb.

Power supply

Lithium Ion Battery
